

Dart Sails & Covers

Trysail

Dart Sails Storm sails are not off the shelf items, they are custom designed and cut individually to suit the deck and spars. Badly setting Storm Sails are a liability not what you need when your life or your children's life depends on it! We take comprehensive measurements and computer design our Storm Sails just like all other sails. The seams have at least 3 rows of 3-step anti snag stitching for ultimate reliability. The Trysail will be designed to sheet to the spinnaker sheet blocks allowing the sail to be used

independent of the boom, or if on a lee shore or racing and the sail is required to sail to windward a reef line can be used as an outhaul onto the main boom allowing the sail to be close winded, therefore increasing efficiency. A rope or wire stop is spliced to the tack to raise the tack above stored mainsail. Made in a high visibility Orange heavy Dacron to aid emergency services locate the boat should it be necessary. Our Storm sails conform to ISAF, ORC and Charter Coding safety regulations
